TRElab...in brief

Transport Research Lab (TRElab) is a cross-disciplinary grouping of leading academics focusing on transportation research at Roma Tre University.

TRElab is an independent, cutting-edge experimentation environment where academics, policy-makers, entrepreneurs and citizens work together to co-create effective, efficient and sustainable transport solutions.

TRElab provides data, information and knowledge to help cities and regions create an evidence-based ground to define their innovative mobility policies and measures.

TRElab is active in <u>Research</u>, <u>Education</u> and <u>Consulting</u> on the following methods and topics:

Methods

- ⌄ Stated Preference and Discrete Choice Modeling
- ⌄ Agent-Based Modeling
- ⌄ Gamification
- ⌄ Living Lab
- ⌄ Focus Group and In-Depth Interview
- ⌄ Interactive Multi Actor Multi Criteria Analysis
- ⌄ Delphi Analysis

Topics

- ⌄ Sustainable City Logistics Solutions
- ⌄ Participatory policy planning and making
- ⌄ Sustainable Urban Mobility Plans
- ⌄ Behavioural analysis and behaviour change
- ⌄ Policy evaluation
- ⌄ Demand modeling and willingness to pay
