CITIES AND REGIONS FOR TRANSPORT INNOVATION

Scaling adoption of electrified vehicles under the “new normal”

Jasmeet Khurana
Manager, Mobility, WBCSD

December 2020

Business leadership for a sustainable future .

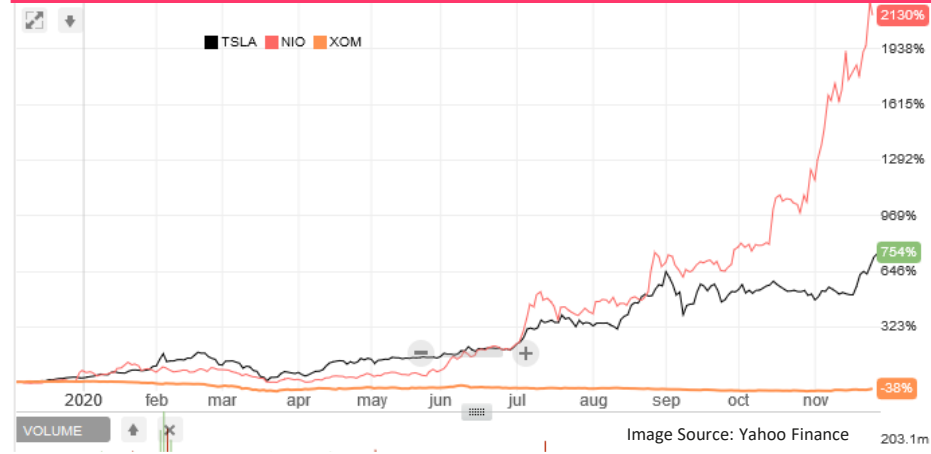

World Business Council for Sustainable Development (WBCSD)

200 global companies united around a common vision
creating a world in which over 9 billion people are all living well
and within planetary boundaries by 2050

Building forward better – New Green Deal/s

Capital flows for a new world

Transforming mobility patterns

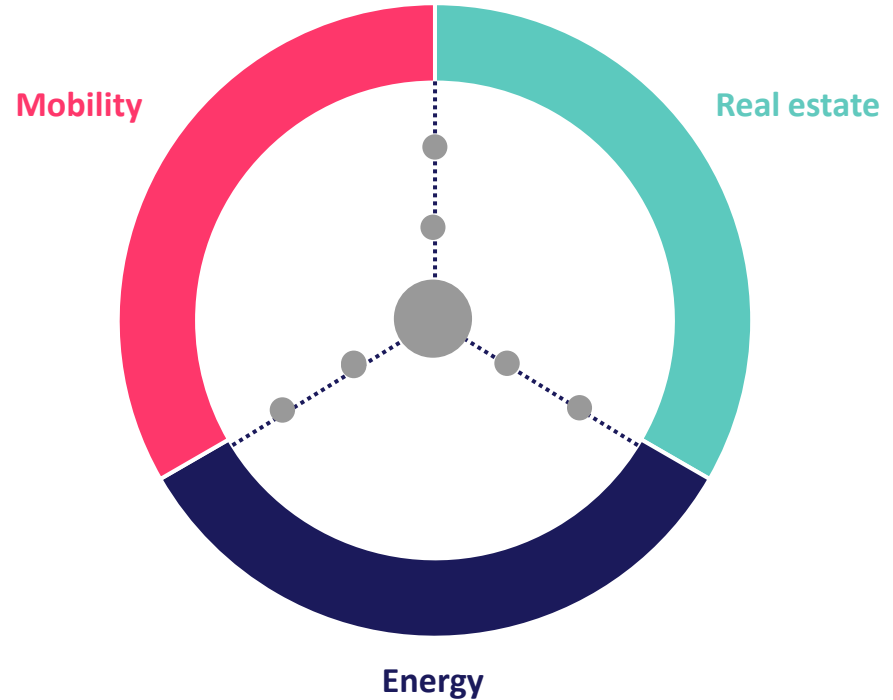

Ambitious national policies

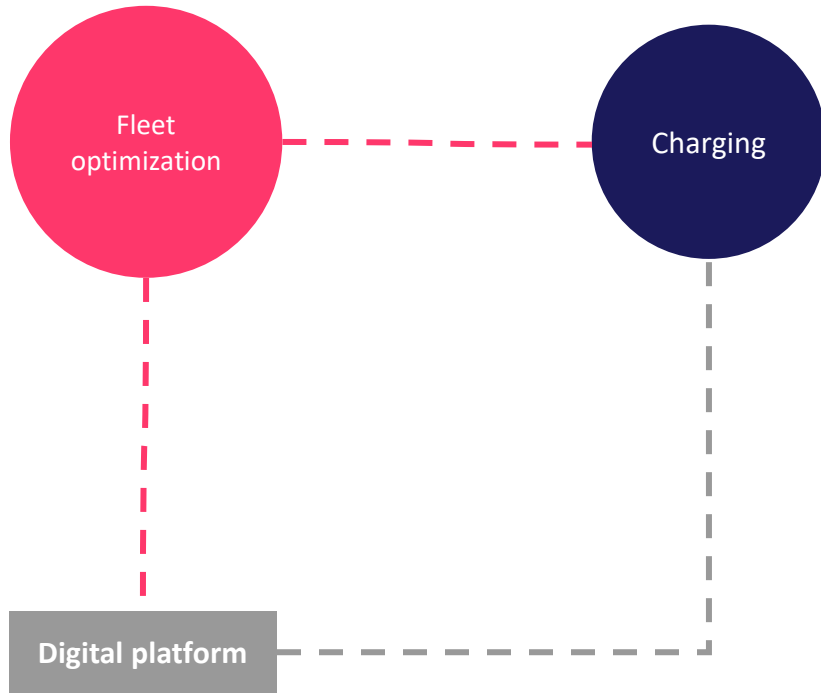

Unlocking value in the global transition to EVs

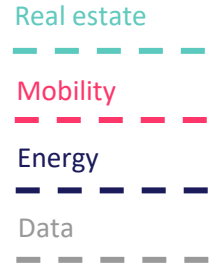

The potential **value** of the transition to EVs resides **at the intersection of mobility, real estate and energy**. Collaboration will **accelerate EV adoption** and **strengthen the business case** for efficient electric fleets, effective space management, enable grid management to increase renewables and help attract capital.

Making mobility, infra and space-management smarter through collaboration

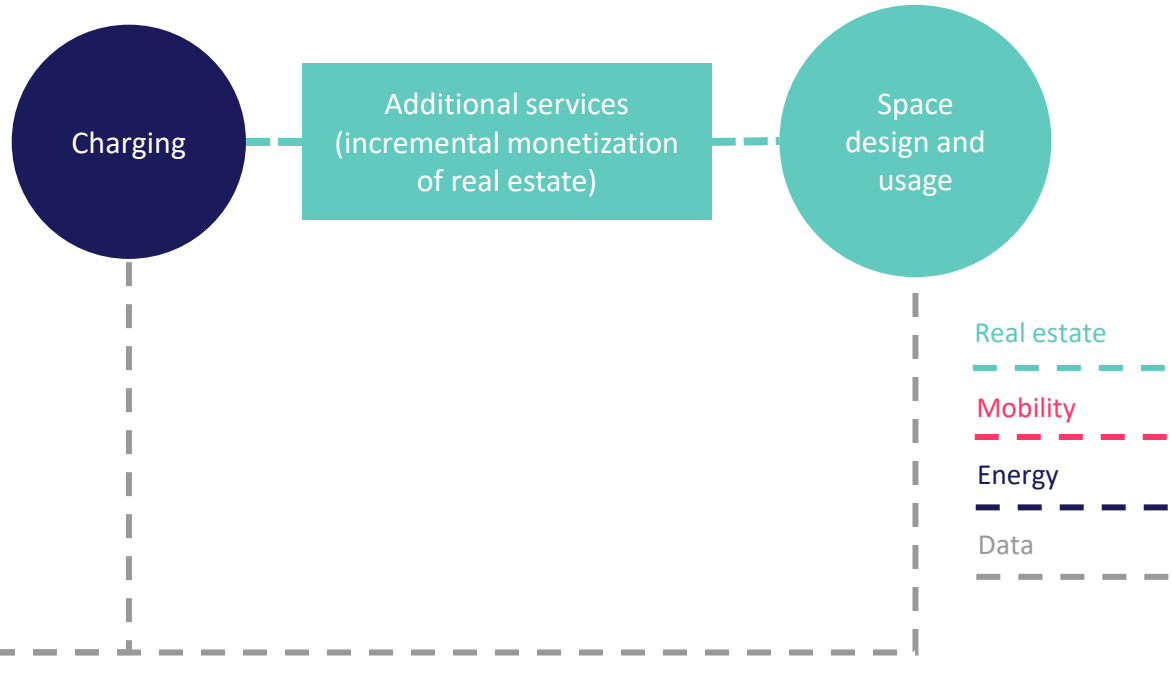

1. How can electric, connected fleets accelerate the creation of an economically viable charging infrastructure that supports the energy transition?
2. What kind of partnerships and licensing agreements be activated for long term collaboration?

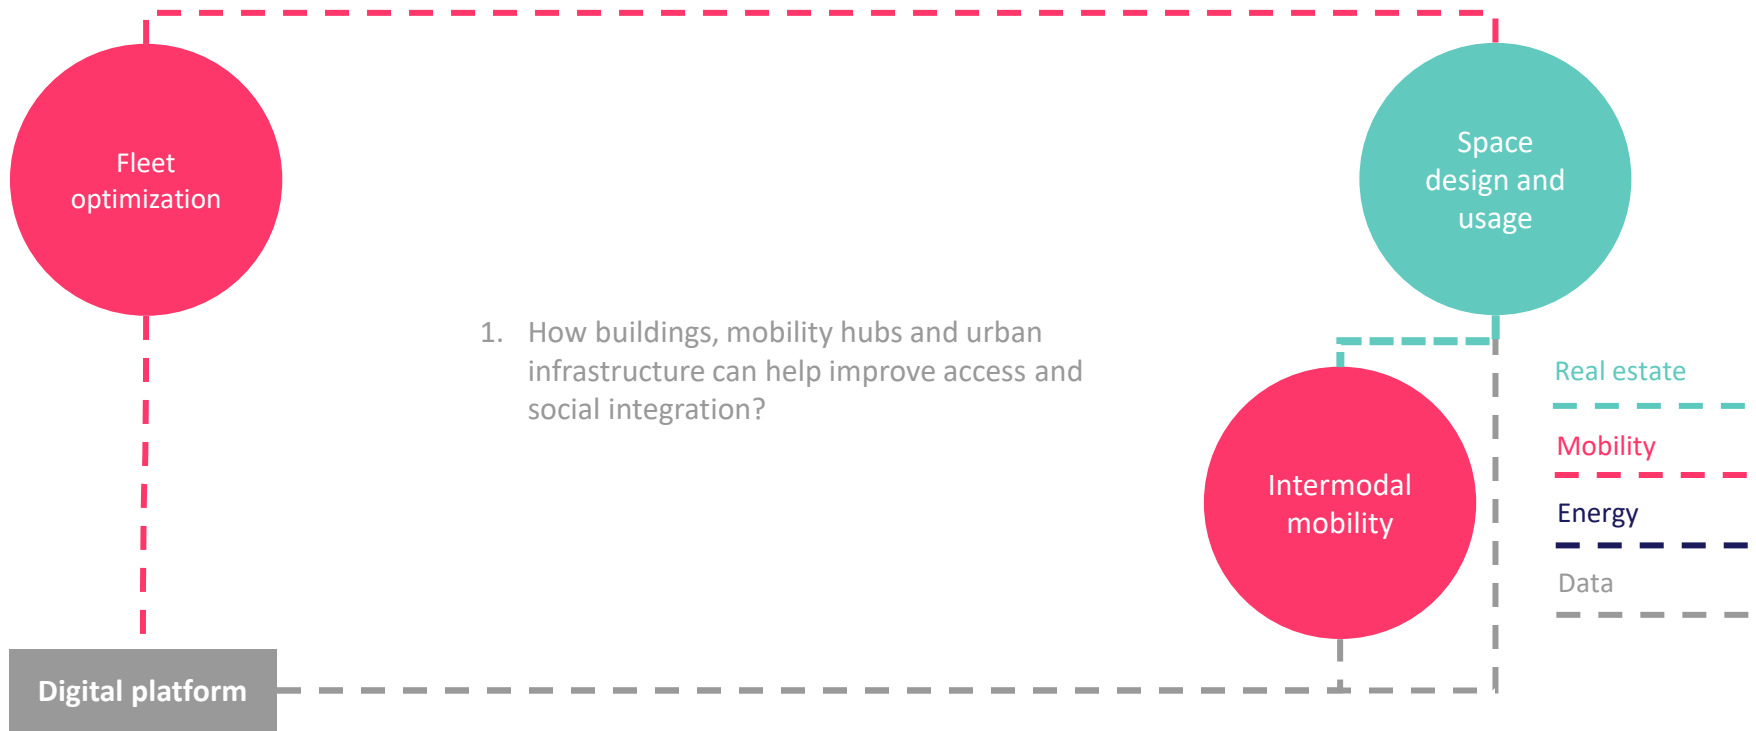

Making mobility, infra and space-management smarter through collaboration

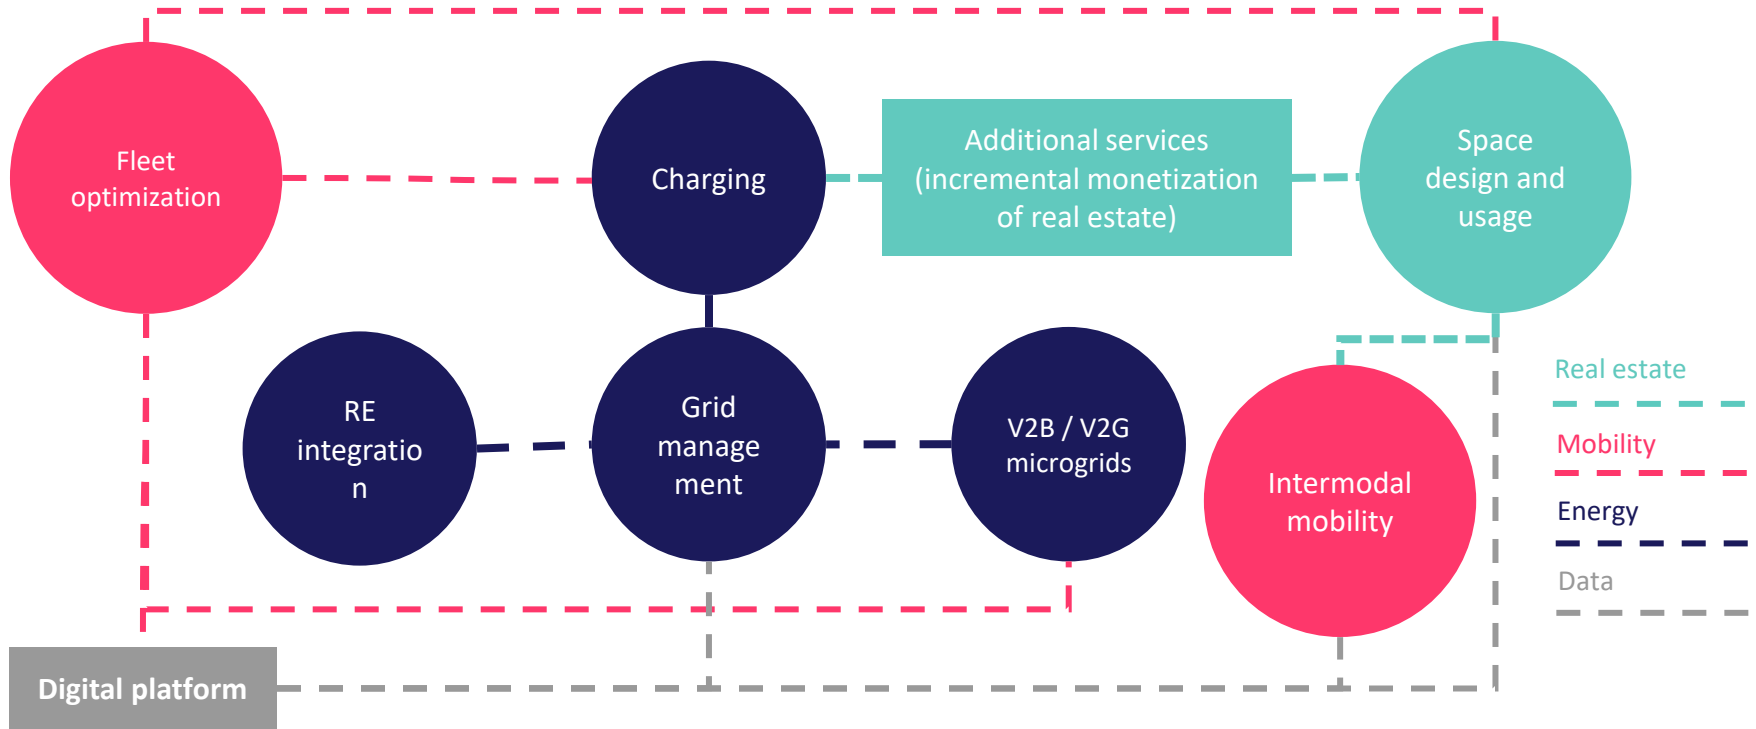

1. Is the current real estate licensing model fit for purpose for what we are trying to achieve?
2. How can the value of space be enhanced / monetized by opening it up to mobility services?
3. How to make real estate ready for future requirement from space?

Making mobility, infra and space-management smarter through collaboration
