

Together towards a  
sustainable, viable region

# A very brief history of the Netherlands

Consensus decision-making:  
a pragmatic recognition of pluriformity  
cooperation despite differences

Development of a tradition of multi partite  
cooperation

## The position of a province in the Netherlands

The provinces of the Netherlands have seven core tasks

- Sustainable spatial development, including water management.
- Environment, energy and climate
- Vital countryside
- Regional accessibility and regional public transport, road safety
- Regional economy
- Cultural infrastructure and preservation
- Quality of public administration

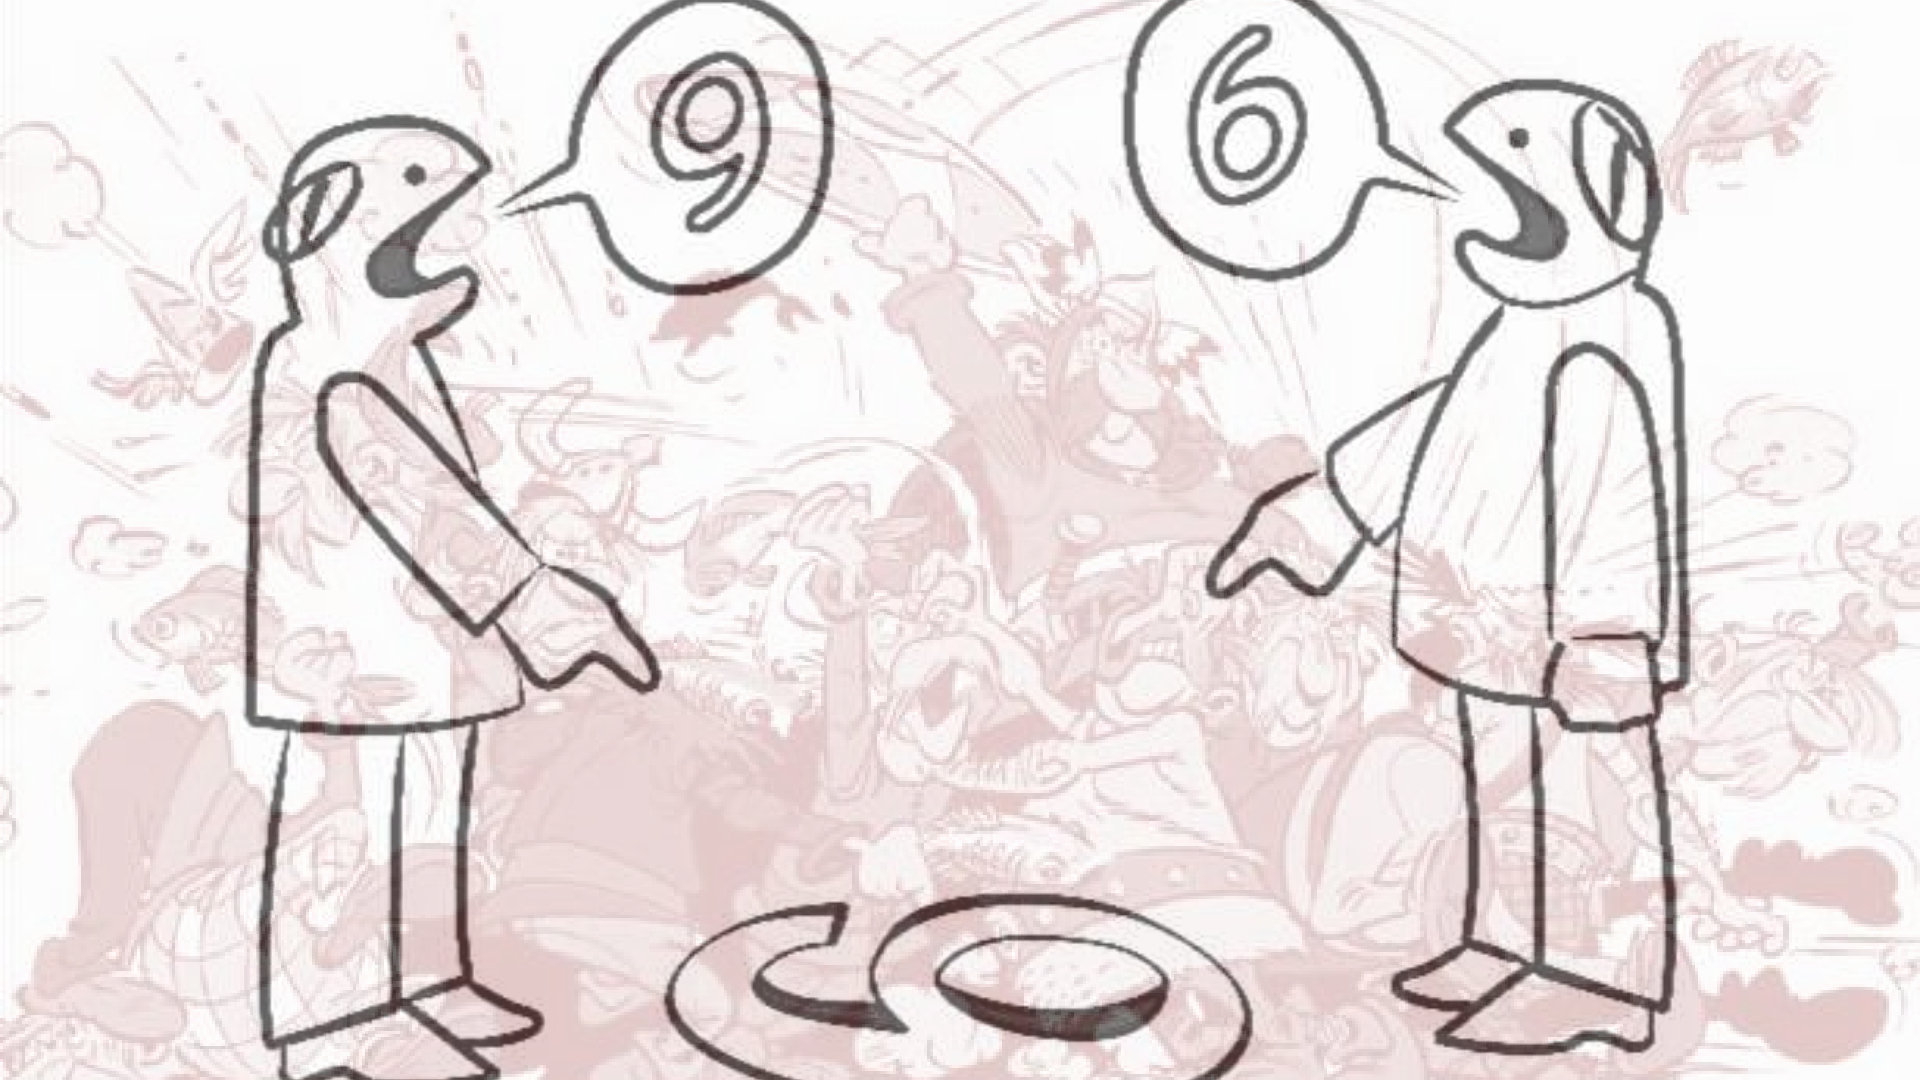

# PROVINCE OF UTRECHT

N 230

- Road authority for main regional roads
  - Public transport authority
  - Road safety authority
  - National/ EU advocacy/promotion
  - etcetera
- 
- Investments
  - Subsidies
  - Regional programs

## Data and Knowledge Hub Healthy Urban Living

Independent and open platform of public and private organisations.

Addition to 'more formal' ways of measuring.

On the other hand, concerned residents contribute to knowledge and solutions to issues related to our living environment and health with their own measurements and research.

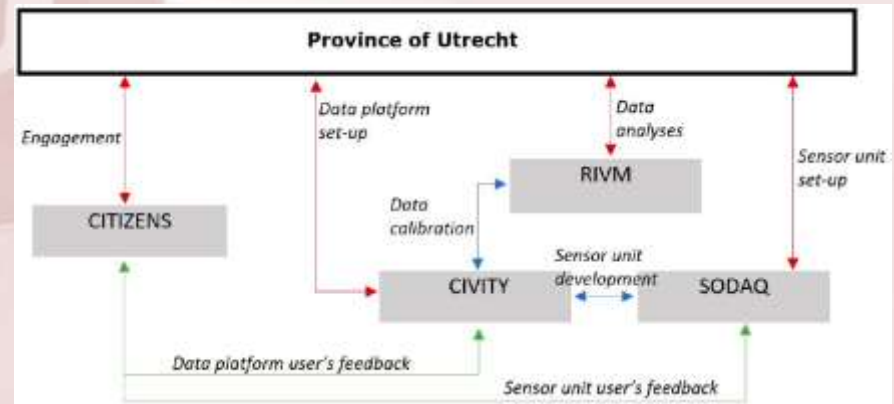

*Data and Knowledge Hub*  
**Healthy Urban Living**

- living labs and knowledge ecosystems with new technologies, sensors, platforms, (open) data and public services
- towards concrete, useful policy measures for a healthy living environment
- together with, and for, each resident: measuring healthy living environment
