POLIS
CITIES AND REGIONS FOR TRANSPORT INNOVATION

Research & Innovation for Action

Workshop on Urban Mobility

7th June 2022, Glasgow City Chambers

- Workshop organised by POLIS in cooperation with Innovate UK and ERTRAC
- Hosted by the City of Glasgow
- In-person attendance required (online not available)
- When: 14h00 to 16h30 (UK Time)
- Where: Committee Room 8, Glasgow City Chambers, 82 George Square, Glasgow

Why this is important:

The transition to a climate-neutral Urban Mobility requires **action**. Local and regional authorities hold the keys to advancing the transition on the ground. Their **leaders** need Research & Innovation to provide them with useful insights and practical solutions, to ensure critical priorities are implemented in a fair, efficient and effective way.

This Workshop will be shaped as a **discussion among peers**, focusing on **three issues**:

- 1) What is currently 'hot' in urban mobility R&I to accelerate decarbonisation?
- 2) How can we orient urban mobility research to best support leaders in advancing the transition to Sustainable Urban Mobility, through "avoid-shift-improve" policies?
- 3) How can we ensure a continued level of EU-UK cooperation in this domain?

Output from this Workshop will be shared with the leaders attending the POLIS Leadership Summit "The Transition to Zero-Emission" (following day, 8th of June), and guide our efforts to position Urban Mobility R&I as an essential activity in Horizon Europe.
