

TOMORROW. MOBILITY

WORLD CONGRESS

7 - 9 NOV 2023 | BARCELONA & ONLINE

Tomorrow.Mobility World Congress (TMWC), held within the framework of Smart City Expo World Congress, will bring together industry executives, government leaders, and global experts to address the crucial challenges the transportation sector is facing, displaying effective and proven solutions to go beyond green and make your move matter for cities and the planet.

Thought leaders, urban planners, and industry drivers are on a journey to transform the way we move across our cities and improve their liveability. Only by embracing innovative solutions and leveraging technology for people we have the potential to improve urban mobility, making it clean, safer, more efficient, and citizen-focused.

Co-organized between Fira Barcelona & EIT Urban Mobility, TMWC is the place to join this movement and make your move matter to a better urban mobility.

SEE YOU AT #TMWC23 IN BARCELONA!

“
The Tomorrow.Mobility World Congress brings together 20,000 people, so let's give ourselves the gift to really rethink what kind of future cities we want and what kind of humanity we want to be.”

MARCO TE BRÖMMELSTROËT
Professor in Urban Mobility Futures, University of Amsterdam
